

Rewards

Your rewards for the task depend on the scores of all combinations, not just the final or best score. *Each point in the animals' scoring system is worth \$0.001.*

Scores range from 0 to 100, so if you found combinations worth 42, 67, 55 and 89 points, the score-based reward for those would be $(42+67+55+89) \times \$0.001 = \0.25 .

If you got a score of 50 for each of the 25 rounds, your bonus reward would be \$1.25. If you got scores of 100 for all 25 rounds, the reward would be \$2.50.

You must complete all tasks to get the rewards.

Your rewards for each of the three species you'll try to understand will be added to your final payment.
